### **DETAILED ACTION**

Receipt is acknowledged of a reply to the previous Office Action, filed January 16, 2009.

Claims 113-122 are pending, with claims 117-122 under consideration in the instant application. Any rejection of record in the previous Office Action, mailed October 16, 2008 that is not addressed in this action has been withdrawn.

Because this Office Action only maintains rejections set forth in the previous Office Action and/or sets forth new rejections that are necessitated by amendment, this Office Action is made FINAL.

### ***Information Disclosure Statement***

The information disclosure statement filed May 18, 2008 fails to comply with 37 CFR 1.98(a)(3) because it does not include a concise explanation of the relevance, as it is presently understood by the individual designated in 37 CFR 1.56(c) most knowledgeable about the content of the information, of each patent listed that is not in the English language. It has been placed in the application file, but the information referred to therein has not been considered.

The relevancy of the JP 11-322781 reference has not been disclosed by the Applicant, only the International Search Bureau. MPEP 609 states that for non-English documents, there must be a concise explanation of the relevance as presently understood by applicant/attorney.

***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 117-122 stand rejected under 35 U.S.C. 103(a) as being unpatentable over Lopez-Egido et al in view of accession number K01347 (GFAP, SEQ ID NO: 250 and 120). This rejection is maintained for reasons for reasons of record.

**Response to Arguments Concerning Claim Rejections – 35 USC § 103 (a)**

Applicants' arguments filed on January 16, 2009 have been fully considered. The following grounds of traversal are presented:

Lopez-Egido et al do not teach an interaction between c-Jun and GFAP. Accession number K01347 fails to remedy this deficiency.

Applicant's traversal has been fully considered and found not to be persuasive for the following reasons.

The claims are not limited to an interaction between c-Jun and GFAP. In claim 117, what is claimed is a method for detecting an interaction between a bait and a prey. The bait can be SEQ ID NO: 120 (part a), which is taught by Lopez-

Egido et al and Accession number K01347. The prey can be any protein. The only protein limited to interacting with c-Jun are in parts b and b', but these parts are alternate limitations.

***Allowable Subject Matter***

No claims are allowed.

**THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
